

Shlok Jain

AI Engineer — Python Developer

+91-9109656904 — [LinkedIn](#) — connect.shlokjain@gmail.com — [Github](#) — [Portfolio Website](#)

PROFILE

I am a Python AI Developer with over 2 years of hands-on experience in building scalable AI and backend systems. My expertise lies in *Machine Learning, Natural Language Processing, REST APIs, LLMs, RAG, and NL2SQL systems*.

Currently working as an AI Engineer, I am focused on real-world applications including RAG-based systems, NL2SQL models, and LLM integrations using LangChain and CrewAI. I have also contributed to projects associated with the **Ministry of Defence**, working on production-level AI solutions (NDA restricted).

I also have working knowledge of generative AI models including **LLaMA, Stable Diffusion, and DALL-E**, along with experience in agentic AI frameworks, web scraping, and building production-grade APIs.

Passionate about solving business problems using AI and backend engineering, I am seeking opportunities to contribute to scalable, production-level systems.

EXPERIENCE

Upsala — AI Engineer

Sep 2025 – Apr 2026

- Developed RAG pipelines and NL2SQL systems for production use
- Integrated and fine-tuned LLMs using LangChain and CrewAI for intelligent workflows
- Built scalable backend APIs and services
- Contributed to AI solutions for Ministry of Defence use cases (NDA restricted)

Flynaut SaaS — Python AI Developer

Oct 2024 – Sep 2025

- Built and deployed REST APIs using FastAPI and Django
- Developed AI/ML models, web scraping pipelines using Scrapy and BeautifulSoup
- Worked independently across the full stack including ML, NLP, and Computer Vision

AI Variant — Data Science Intern

May 2023 – Nov 2023

- Led end-to-end development of NLP and ML projects as **Team Lead**
- Handled data collection, EDA, model building, evaluation, and deployment
- Worked on ML models, NLP tasks, and model deployment pipelines

EDUCATION

Bachelor of Technology (CSE) — Parul University

2019 – 2023

Secondary School (PCM) — Macro Vision Academy

2019

SKILLS

Languages: Python, HTML/CSS, R

Web & Backend: FastAPI, Django, Flask, REST APIs, AngularJS

Libraries & Frameworks: Pandas, NumPy, Matplotlib, Scikit-Learn, TensorFlow, PyTorch, OpenCV, BeautifulSoup, Scrapy, Spotipy

AI & GenAI: LangChain, CrewAI, LLaMA, Stable Diffusion, DALL-E, RAG, NL2SQL, NLP, Computer Vision

Tools & Platforms: Docker, AWS, Google Colab, Jupyter Notebook, Power BI, Tableau, MySQL, PostgreSQL, PgAdmin, Streamlit, WSL

Core Areas: Machine Learning, Deep Learning, NLP, Computer Vision, LLMs, Agentic AI

Certification: Gen AI & Agentic AI — ExcelR (2025)

PROJECTS

LLM-Based RAG & NL2SQL System

(Current / Most Relevant)

- Developed RAG pipelines for context-aware information retrieval
- Built NL2SQL systems to convert natural language into optimized SQL queries
- Integrated LLMs using LangChain for real-world applications
- Designed system for scalable and production-level usage

NLP Review Classification System

Team Lead — Nov 2023

- Led full project lifecycle from EDA to deployment as Team Lead
- Built NLP pipeline using TF-IDF and Random Forest; achieved **97% accuracy**
- Deployed using Streamlit (global + local) and Flask

Music Recommendation System

Team Lead — Sep-Oct 2023

- Led data collection, model selection, evaluation, and deployment
- Implemented K-Means clustering for recommendation engine; achieved **93% accuracy**
- Integrated Spotify API via Spotipy with FastAPI REST backend
